

SLAM Release Notes

Version 2.0 to 2.1

- Added menu items for remote meter operation. There are two menus. The first (Remote | Setup) allows the user to connect his meter to a COM port and have the computer setup the meter for remote operation. The other (Remote | Download) allows the user to download the contents of a meter after it has been collecting data in a remote location.
- Fixed the Season Dialog to handle the double click on the season name to open it.
- Fixed an issue where sometimes the toolbar contained no icons.
- Fixed the about box to use the Signalysis standard.
