FOR IMMEDIATE RELEASE

Announcing. . . . . . . **XCalibrate**
Low-Cost Transducer Calibration System

Cincinnati, Ohio   Signalysis President, Neil Coleman, Announces the release of XCalibrate, an affordable transducer calibration program that is accurate, fast and easy to use.

When you want accurate transducer sensitivities in just seconds, XCalibrate delivers. XCalibrate calibrates in conformance with MIL-STD-45662A, using a NBS traceable accelerometer as its reference and the data measured from the test transducer to determine the test transducer sensitivity. Multiple calibration frequencies and amplitudes are easily entered in the test setup table.

Benefits:

□□ Enter up to 30 target frequencies and amplitudes to calibrate
□□ Real-Time display of sensitivity curve as it develops
□□ Easily maintain a database of all transducers tested
□□ Schedule next calibration dates
□□ Print Calibration Certificate
□□ The graph wizard makes formatting of graphs a cinch

Let the power of XCalibrate work for you.

Signalysis is a software development and consulting services firm for the scientific and engineering communities.
